

PRESS RELEASE

Gemini's New Cast Plaque Foundry Is Fully Operational

FOR IMMEDIATE RELEASE

Decorah, IA – Gemini Incorporated, one of the world's leading manufacturers of letters, logos and plaques for the sign industry, announces the opening of its newest 30,000-square-foot plaque foundry in Decorah, Iowa. The new foundry is fully operational, expanding Gemini's casting capacity to sizes of more than 7 feet in diameter!

The decision to expand the company's plaque manufacturing facilities by building a new foundry was made to meet a growing demand for plaques within the sign and recognition industries. Gemini broke ground on the facility in the fall of 2007, and construction continued through the winter of 2007-2008, working on the building throughout one of the coldest and snowiest winters in recent memory.

Gemini workers hold up a 7" cast aluminum plaque made at the company's new foundry in Decorah, Iowa.

Leading the effort at the new Decorah foundry is Plant Manager Kevin Weselmann. A 23-year veteran of Gemini, Weselmann had previously been the plant manager for Gemini's cast letter foundry in Decorah. Already, cast bronze and aluminum plaques are being made on a routine basis.

Besides cast plaques, Gemini offers etched, ADA, Bas Relief, ceramic inserts, Giclée, and Photo Relief plaques. To serve its customers better, Gemini has seven production facilities located in North America: Cannon Falls, Minnesota; Decorah, Iowa; Fallon, Nevada; Taylor, Texas; and Farmville, Virginia in the United States; Neustadt, Ontario in Canada; and Tamaulipas, Mexico. For more information about Gemini plaques and markers, visit www.geminiplaques.com or call Gemini toll-free at 1-877-877-2922.
